

AonSaver Russell Moderate Fund

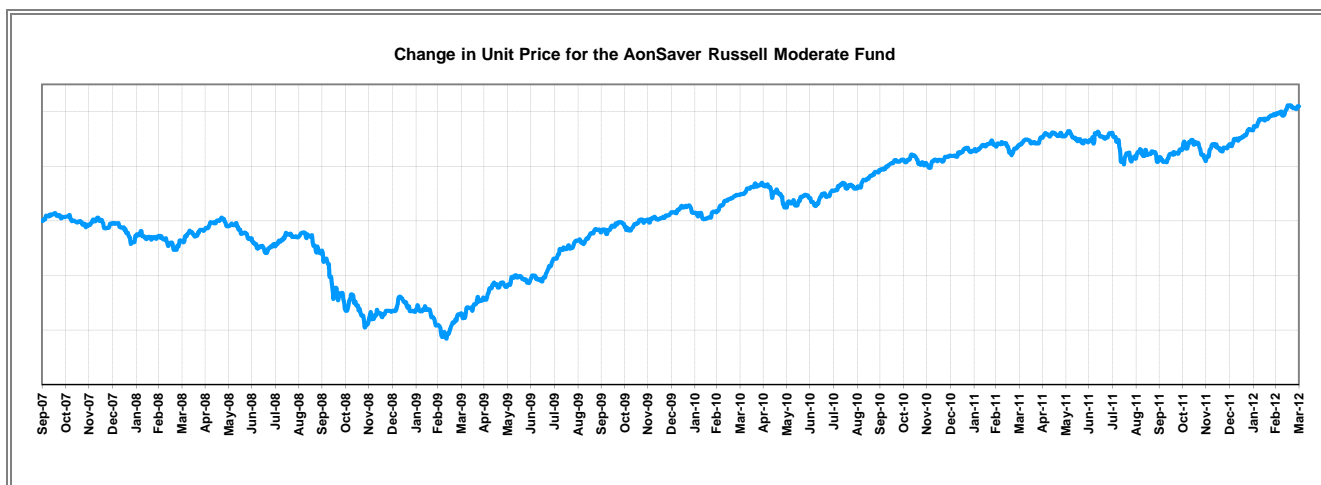

31 March 2012

The AonSaver Russell Moderate Fund has a 40% allocation to Growth assets and a 60% allocation to Income assets. This enables the AonSaver Russell Moderate Fund to invest in a diversified range of asset classes which includes shares, property, fixed interest and other assets. The Fund's objective is to provide investors with medium term capital growth through exposure to a diversified investment portfolio, recognising that this will be accompanied by some volatility.

Russell Investment Management Limited

Russell's mission statement for more than 70 years has been 'Improving financial security for people' and this lays the foundation for all they do. Established in 1936, Russell provides investors access to a level of investment expertise that until recently was reserved only for the world's largest corporate investors.

Everyone studies performance. But performance is, by definition, backward-looking. At Russell, research looks forward. They hold more than 5,000 meetings with investment managers each year. They get to know managers well enough to see developing trends long before performance tracking reveals them. Then they move swiftly and cost-effectively when changes are needed.

In Russell's view, no other firm invests more time and people scouring the globe for tomorrow's leading managers. From the 8,000 investment manager products that Russell reviews, they include only 46 of the best to work for New Zealand investors. This exacting approach means the world's best investment ideas are contributing to the performance of your portfolio.

Investment Returns are reported before tax but after management fees. Past performance is not necessarily an indicator of future performance.

Returns are calculated based on changes in the unit price and after allowing for any applicable rebates.
